I. AIMS AND PRINCIPLES

1. The International Falcon Movement - Socialist Educational International

The International Falcon Movement - Socialist Educational International (IFM-SEI) is an international educational movement working to empower children and young people to take an active role in society and fight for their rights. We are an umbrella organisation for child and youth-led movements all over the world, educating on the basis of our values of equality, democracy, peace, co-operation, solidarity and friendship. Through our member organisations and our international activities, we aim to ensure that children and young people are well informed about their rights and are empowered to ensure they are respected. To reach this goal, we organise a variety of activities including seminars, training courses, international camps and conferences.

2. A world organisation

IFM-SEI is a world movement of different types of organisations that work with children and young people and that share the aims and principles of IFM-SEI.

3. Children's rights

The United Nations Convention on the Rights of the Child is a key document in all our work. Through peer education, we aim to educate children and young people about their rights and support them to ensure they are respected.

4. Education

Education is the most powerful tool to achieve social change. Through non-formal education, we create a space for children and young people to develop critical awareness and empower them to challenge the inequalities in our world. We educate on the principles of respect, equality and friendship that are essential for the creation of a world where all may live in peace and solidarity. We call this socialist education.

5. International solidarity

Our motto is "Span the world with friendship". Only by coming together as a global movement will we be able to challenge and change the current world order. We actively encourage solidarity by providing opportunities for inter-cultural exchange and learning to take place. Our activities work towards this fundamental principle as we can best achieve our aims by learning from each other, working together and supporting each other's struggles in solidarity.

6. Equality

We educate and campaign for an inclusive and equal society. Therefore, we combat any kind of discrimination such as fascism, racism, xenophobia, homophobia, trans*phobia and misogyny within and outside of our organisations.

7. Gender equality

We are a feminist organisation. We fight against patriarchy and for equality of all genders. We reject the gender binary and recognise that there are more than two genders. We do not accept that women and non-binary gendered people still face discrimination on a day-to-day basis in all societies. We are a feminist organisation and we fight for equality between genders and against patriarchy. Therefore, we educate for equal rights and awareness of gender stereotypes, discrimination and privileges and we use affirmative action and tools such as the gender quota in our organisations.

8. Environmental sustainability

IFM-SEI is concerned about the misuse of the world's diminishing resources and the connected dangerous change to the world's climate. Consumerism and the extreme exploitation of natural resources by the wealthy few in society have a severe natural and human impact, disproportionately affecting poor people. We encourage member organisations to protect their own environment and take actions that support sustainability in the ecological, social, and economic sense, so that today and in the future, everyone has access to a healthy, stimulating and secure environment.

9. Peace

Peace is more than just the absence of war. We choose peace and are dedicated to a world where everyone can live in a non-violent environment free from abuse, war, bullying, discrimination, exclusion, and fear, that is healthy and stimulating and where conflicts can be peacefully transformed. IFM-SEI undertakes peace education and promotes peace initiatives whenever and wherever possible. Peace education must always criticize reality and the normative way to understand it but it also has to give an alternative. Peace will only be really achieved when all forms of exploitation cease.

10. Democracy

We believe that people should be able to take part in decision-making at all levels in meaningful and inclusive ways. Democratic processes govern IFM-SEI and its member organisations. Children and young people are involved in all levels of decision-making in our movement, from their local groups to the world congress. It is our firm belief that children are able to make decisions and have valid opinions on a wide variety of issues from a local to a global level, but they need to be heard in society. We provide the space for children to develop their knowledge, attitudes, values, and skills to secure their equal participation in the democratic process and we make sure that adequate spaces for

participation are provided.

11. Anti-capitalism

The capitalist system that our society is based on creates inequality. Those suffering the most from inequality are children living in poverty who lack opportunities to develop their potential. We recognise the power that neoliberal ideology yields. In our work, we challenge the notion that competition is a characteristic of human relations and fight for alternative economic models that will bridge the gap between rich and poor and emphasize solidarity, dialogue and partnership. IFM-SEI undertakes critical education to understand the mechanisms behind capitalist systems and advocates for an alternative system, as we are only able to eradicate all forms of exploitation and end poverty once capitalism is defeated. We aim to include everyone in our activities no matter their economic means.

12. Freedom

IFM-SEI is dedicated to a world where everyone can live in freedom without being bound by war, borders, undemocratic political systems, or poverty. We believe that everyone has the right to freedom of choice and freedom of speech and the freedom to develop their own identity as long as it does not restrict other people's human rights.
