Some of our members were part of the working together for Peace activity on Utoya. There they were missing discussions on the connection of war and state, especially what our role as people is living in a state that is actively taking part in war or readying itself for the possibility of an oncoming war. This resolution is trying to expand how we talk about war and what other factors should also be considered in our peace education.

IFM-SEI is a socialist and antimilitaristic children and youth led movement. Therefore we state:

1. People who have to fight in wars kill and die in them. Wars are never in the interest of the people fighting them.
2. This is because the interests of people and states are contradictory in war. The state is using humans as material to enlarge its area of power and influence, and accepts their possible death as a price. It is the foremost interest of humans to survive.
3. Moreover, we don't only want to survive, but to have a good life. Part of this is shaping the world together, for which we need the skills and creativity of all people as well as an intact ecosystem. All of this is destroyed in war.
4. Because we understand this, it must be our political stance to be active against all wars and militarization no matter how close or far away they may seem. Activism against war can never mean taking the side of a state.
5. This is why peace education has to be more than teaching young people to interact peacefully. We also have to enable them to understand these systemic connections and become able to act against them.
